

CS 466: Project Presentation Rubric

- Content → **15**
- Figures / Graphics → **15**
- Results → **10**
- Participation → **10**

Total = **50**

Evaluation Criteria	Excellent	Good	Needs Improvement
Content & New Analysis (15 pts)	15 pts – Motivation clearly presented. Project description is easy to follow and articulated smoothly. Clearly highlights new analysis or an additional KDD step (e.g., new visualization, feature engineering, modeling improvement, or unique insight).	10 pts – Motivation present but somewhat vague. Project description mostly understandable. Some additional analysis attempted but not clearly explained or justified.	8 pts – Motivation unclear or vague. Project description difficult to follow. No clear new analysis or KDD extension beyond earlier work.
Figures / Graphics (15 pts)	15 pts – Figures and graphics are well presented, clearly explained, and significantly enhance understanding of the project.	10 pts – Figures are present but explanations are limited or somewhat unclear; graphics add moderate value.	5 pts – Figures poorly explained, confusing, or unrelated to the presentation.
Results & Interpretation (10 pts)	10 pts – Results clearly explained and tied to the problem being addressed. Appropriate technical terminology used and interpretation is insightful.	7 pts – Results presented but explanation of how they relate to the problem is somewhat unclear.	5 pts – Results vague, poorly explained, or do not address the project objective.
Participation of Each Student (10 pts)	10 pts – All team members participated actively and contributed to the presentation.	8 pts – Most members participated (~80%).	5 pts – Limited participation (~50% or fewer members actively presenting).
